AGROTECH FRONTEND DEVELOPER

Agrotech Frontend Specialist with hands-on experience building mobile-first web systems for agriculture and food-system teams. Skilled in using React and modern JavaScript to create simple, accessible interfaces that work reliably in low-bandwidth environments. Focused on turning real farming workflows—farmer registration, field data collection, and communication—into practical digital tools that support better decision-making and real-world impact.

STRENGTHS AND EXPERTISE

Creative & Design Expertise	Technical Strengths	Soft Skills & Collaboration
Aesthetics and Visual Design	Core Technologies Mastery	Problem-Solving
UI/UX Principles	Frontend Frameworks and Libraries	Attention to Detail
Motion Design & Animation	Web Performance Optimization	Continuous Learning

PROFESSIONAL EXPERIENCE

Ambientechs   **October 2025 - Present**
Frontend developer (Intern)

Contributed to the development of responsive web applications using React.js and modern frontend technologies. Collaborated with cross-functional teams to deliver user-centric solutions while enhancing technical skills in a professional environment.

Accomplishments:

- Developed and deployed 3+ responsive web components that improved user engagement by streamlining navigation and enhancing mobile accessibility
- Collaborated with design and backend teams to integrate RESTful APIs, reducing data loading time by 20% through optimized fetch patterns
- Implemented pixel-perfect UI designs from Figma mockups, ensuring 100% design fidelity and cross-browser compatibility
- Refactored legacy code to follow modern React best practices, improving code maintainability and reducing technical debt
- Participated in daily standups and sprint planning sessions, consistently meeting project deadlines and delivery milestones
- Conducted code reviews and provided constructive feedback to peers, fostering a collaborative learning environment
- Built reusable component library that accelerated development time for future projects by 30%

Squarex Startup   **January 2025 - July 2025**
Lead Frontend designer (Contract)

Led design initiatives for a growing startup, translating business requirements into compelling visual solutions. Managed end-to-end design processes from concept to final implementation, ensuring brand consistency and user-centered design across all digital touchpoints.

Accomplishments:
- Led the design and development of the company's primary web platform, resulting in a 40% increase in user engagement and improved conversion rates
- Established and maintained a comprehensive design system with reusable components, reducing development time by 35% across multiple projects
- Collaborated directly with founders and product managers to define user experience strategies and prioritize feature implementations
- Designed and prototyped user interfaces using Figma, conducting iterative improvements based on user feedback and analytics
- Implemented responsive designs using React and Tailwind CSS, ensuring seamless experiences across desktop, tablet, and mobile devices

Freelancing   **January 2023 - Present**
Frontend developer

Provided frontend development services to diverse clients across multiple industries, delivering custom web solutions tailored to specific business needs. Managed full project lifecycle from client consultation to deployment and maintenance.

Accomplishments:
- Successfully completed 10+ web development projects for clients in e-commerce, healthcare, education, and creative industries
- Built responsive, SEO-optimized websites that increased client visibility and drove measurable traffic growth
- Managed client relationships independently, from initial requirements gathering through final delivery and post-launch support
- Developed custom e-commerce solutions with integrated payment gateways, shopping carts, and inventory management systems
- Created portfolio and business websites for photographers, consultants, and small businesses, enhancing their digital presence
- Implemented cross-browser compatible solutions using HTML5, CSS3, JavaScript, and jQuery
- Collaborated with designers and backend developers to deliver cohesive, full-featured web applications

EDUCATION

Obafemi Awolowo University
Bachelor of Engineering Physics
2018 –2024

Self-Taught Developer
Frontend Development Specialization
2019 – Present (Part Time)
- Completed comprehensive online courses in React, JavaScript, and modern web development
- Built 15+ personal projects to master frontend technologies
- Active contributor to open-source projects
